

Removable HD Case (X5)

Main Features

- ◆ The removable hard disk case USB port 2.0 to download the video files easily
- ◆ Military standard connector can support 5000 times “Push and Pull”

Overview

To download the video files by removable hard case is very convenient. Most of Streamax customers download the video files by this way manually.

To support more times “PUSH AND PULL”, Streamax MDVR X5 hard disk case adopts the military connector which can support maximum 5000 times “PUSH AND PULL” and the coppered pins can connect the MDVR device strongly to avoid loose after long time usage and MDVR vibration working condition.

The special screw (we say captive screws) can keep the hard disk from slipping when the customer reverse the MDVR and unlock the hard disk case. Many customers they often forget that the hard disk is not locked. If he reverse the MDVR, the hard disk case will fall and will be damaged without the protection of captive screw)

Specification

Product Series	Removable HD Case
Connector	The military standard coopered connector
Material and weight	Aluminum, 0.7KG (without hard disk inside)
“PUSH AND PULL” times	5000 times
Interface	USB 2.0
Hard disk size	Support 2.5” SATA hard disk
Size (L*W*D)	188.7*117.7*34.5mm
